

## **WASHINGTON PLACE UPDATE NOVEMBER 16, 2018**

### **CONSTRUCTION UPDATE**

The Washington Place team is pleased to report that significant construction progress has been made since our last update. Erland Construction and their subcontractors have been diligently working at the site for nearly two months, successfully facilitating the preliminary phase of this exciting project.

Excavation for the future underground parking garage and building foundation is well underway. Steel piles and wood lagging have been installed around much of the site perimeter. This Support of Excavation infrastructure allows our construction crew to work safely within the large hole. About 50 truckloads of soil material are removed from the site every day. This process will continue throughout the remainder of the year until the entire footprint of the future building is unearthed.

Stay tuned for important updates over the upcoming months. We'll share rental information as soon as it becomes available along with other important announcements.
